PREFACE

For the last 3-4 decades the Inter-University Board has been engaged in two bibliographical projects. The first one, originally undertaken in 1935, was a bibliography of theses accepted by the various Indian universities. There was no differentiation of subjects in the lists that were published, except in a few cases. These lists were published at intervals of 2-3 years for a period of approximately a quarter century. The last list was published in 1958.

The second project related to lists of topics in which research at the doctoral level was being undertaken by the Indian universities. Information in regard to these topics in the various fields was collected uptill 1966 and has already been published. It seems time now to turn to the first project referred to above about which information has been collected till 1970. Now that the first project is being resumed, it has been decided to publish consolidated lists (subjectwise) for the period 1857-1970. The date of 1857 is a formal one in so far as the first Indian universities were established in that year. Research work at the doctoral level was undertaken only towards the end of the last century. Strictly speaking therefore, the information compiled here covers a span of approximately three quarters of a century.

For obvious reasons, information in regard to this project has been compiled in respect of each discipline singly. It is proposed however to combine the various lists under the broad headings of social sciences, physical sciences, biological sciences and the humanities in separate volumes. Perhaps the libraries would like to acquire a complete set. For individual scholars however volumes would be available in respect of

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

their individual subjects. In this way an attempt has been made to cater to the needs of both individual scholars and the libraries.

Once all the disciplines are covered under this project, they will be followed by quinquennial supplements, details of the theses accepted every year being furnished in the Board's monthly journal 'University News'. On completion of the present series of Bibliographies, the other project 'Research in Progress' will be revived, updated and followed by yearly publications.

These bibliographies would chart, it is safe to assume, the course of development of the respective disciplines and, in a sense, would present the history of their growth in India. From this point of view these volumes would fill an important lacuna in the research information available. Indeed a rigorous analysis of the trends of research carried out by subject specialists on the basis of the information provided here should prove immensely helpful.

We hope that the academic world would accord these volumes the same warm reception which they extended to the earlier project 'Research in Progress'.

Amrik Singh
Secretary
Inter-University Board of India

New Delhi,
June 21, 1972.

CONSPECTUS

This bibliography lists 1,798 theses accepted upto 1970 by the Indian Universities for doctoral degrees in the subject of Hindi. These have been classified by the Dewey Decimal Classification (17th Edition) and this governs their general arrangement.

Each entry lists detailed particulars about the theses in the following order : Serial number, name of the scholar, title of the thesis, name of the university/institute, the years when research was begun and completed, and availability note. Unless otherwise stated immediately after the title, the theses have been accepted for the award of Ph.D. degree.

Abbreviations have been used to render the names of the various universities/institutes and a complete list of these abbreviations and their expansions follows the conspectus. For theses where the information about the year when the research was begun was not available only the year of award of the degree has been given. Availability note provides information about the availability of the theses for consultation and use by the research scholars. Unless indicated by one or two asterisks to the serial number a copy of each of the thesis listed is available in the respective university/institute library. The thesis is available in the university/institute office when the serial number is marked by one asterisk but when the serial number is marked by two asterisks it denotes that the thesis is not available. About the theses that have been published, complete bibliographical details are given in the following order: title of the publication, if different from that of the original thesis, publisher and the price.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The scholar index is arranged alphabetically according to the surnames of the scholars. But an important departure from strict alphabetization consists in grouping the surnames pronounced alike. For instance, Misra and Mishra are grouped together and these are arranged in the alphabetical order of their initials. The index directs the user to the text with the help of the running serial number of the entries.

The following statistical table gives the university-wise distribution of the theses accepted at intervals of ten years beginning from 1920. It may, however, be added that the theses listed pertain to the subject of study, no matter under which department of the university the scholar was registered.
